All illuminated outdoor advertising signs shall be equipped with an automatic time controller that prevents the operation of the lighting fixtures between the hours of 11:00 p.m. and sunrise.

2. Non-Glare, Shielded Lighting

Use of glaring, unshielded or unfiltered lights or bulbs shall be prohibited. Lights shall be shielded so as not to project onto adjoining properties or thoroughfares.

Sign illumination that could distract motorists or otherwise create a traffic hazard shall be prohibited.

4. Bare Bulb Illumination

Illumination by bare bulbs or flames is prohibited.

5. Exceptions

Signs constructed of translucent material and lit wholly from within do not require shielding (dark backgrounds with light lettering are preferred). *(revised 3/6/2001)*

C. Location

1. Within a Public Right-of-Way

No sign shall be located within, project into, or overhang a public right-of-way, except as otherwise permitted herein.

2. Compliance with Setback Requirements

All signs shall comply with the setback requirements for principal structures in the district in that they are located, except as otherwise permitted herein.

D. Measurement

1. Sign Area

Sign area shall be computed as follows:

In the case of freestanding, ground, pedestal, and cylindrical signs, the area of the sign shall include the entire structure (including posts or poles)

upon that the sign is located. If the sign or sign structure has openings (for example, between the structure and the sign), the sign area shall be computed by measuring the area of the envelope required to enclose the entire sign and sign structure. (*revised 3/6/2001*)

b. *Individual Letters*

Where a sign consists of individual letters and logo affixed directly to a building, the area of the sign shall be computed by measuring the area of the envelope required to enclose the lettering and logo.

c. *Freestanding Sign*

The area of a double-faced freestanding sign shall be computed using only one (1) face of the sign provided that: 1) the outline and dimensions of both faces are identical (i.e., the outlines of back to back faces shall be coterminous), and 2) the faces are back to back so that only one face is visible at any given time. The area of a double faced signs shall be computed using the area of the larger face if the two (2) faces are of unequal area.

d. *Ground Sign or Pedestal Sign*

The area of a ground or pedestal sign shall be computed by measuring the entire vertical surface of a face upon that the letters and logo are attached. In the case of a multi-faced ground sign, the area of the sign shall be computed using only one face of the sign.

e. *Cylindrical Sign*

The area of a cylindrical ground sign shall be computed by multiplying the diameter of the cylinder by its height.

2. Sign Height

The height of a freestanding sign shall be measured from ground level at or beneath the midpoint of the face of the sign to the highest point of the sign or supporting structure. For the purposes of determining sign height, "ground level" shall be measured from the finished grade, or if there has been filling, from the native grade.

3. Setback and Distance Measurements

The following guidelines shall be used to determine compliance with setback and distance measurements:

- a. The distance between two signs shall be measured along a straight horizontal line that represents the shortest distance between the two signs.
- b. The distance between a sign and a parking lot or building shall be measured along a straight horizontal line that represents the shortest distance between the sign and the outer edge of the parking lot or building.
- c. The distance between a sign and a building or property line shall be measured along a straight horizontal line that represents the shortest distance between the sign and the building or property line.

E. Sign Design Features

The following standards shall apply to signs in office and commercial districts:

1. Location

Signs shall not cover architectural details such as arches, transom windows, moldings, columns, capitals, sills, cornices and similar details.
