COMMERCIAL PERMIT

Prior to an application for proposed work on a commercial building, the following will be needed to determine the permitting process and/or cost.

- Preliminary sketch/drawing of the space/building indicating what work is being proposed.
- Written narrative of proposed work including plumbing, heating, electrical and structural. You must be as specific as possible.
- Site Plan (showing setbacks from buildings, property line and adjacent residences)

After review of the above by the Township Building Inspector, either Williamstown Township will process a completed application or the permitting process will be contracted with the State of Michigan.
